

Completion Date 1984
Cost \$2,200,000
Project Type Educational Facility
Client Hawaii Baptist Academy

Hawaii Baptist Academy Gymnasium

Honolulu, Oahu, Hawaii

Built on the existing Secondary and High School campus, this new 24,000 sq. ft. complex provided much needed facilities for the school, including a gym, weight room, kitchen, and music and computer classrooms. The main structural components of the three-story building consisted of concrete and masonry. An on grade landscaped parking lot was also constructed to support the new project.
