

Completion Date 2006
Cost \$2,300,000
Project Type Single Family Residential

Takeuchi Residence

Honolulu, Hawaii

This custom residence situated along Waialae Country Club was featured in the August 2006 issue of HawaiiHome+Remodeling magazine. The floor slab of this 5,800 square foot home was raised four feet above the existing grade in order provide unobstructed view of the 10th fairway. The golf course can be viewed from the open Great Room, which contains a formal dining area and an elegant living room, which is seamlessly linked to the Lanai via custom made pocket doors. Few steps beyond the Lanai is a large, custom designed pool. The marble tile finish in the Great Room extends all the way to the first step of the Pool, linking the pool with the exterior and interior spaces of the house. The residence also features custom designed laser cut grilles, which emphasizes the contemporary Hawaiian vocabulary of the house.
