

Senior Project Architect

Organization:	Design Partners Incorporated
Date Posted:	
Date Needed:	ASAP
City:	Honolulu
Location:	Hawaii
Country:	United States
Primary Category:	Architecture
Type of Position:	Full-Time
Education Requirement:	BArch
Experience Requirement:	Minimum 6 years, 10+ years preferable

Description & Details

Design Partners Incorporated (DPI) is an employee-owned award-winning architecture firm based in Honolulu, Hawaii. DPI continues its growth as reflected in being ranked #1 by Pacific Business News for the fourth year in row. This recognition reflects the quality and diversity of our portfolio created by DPI's talented and creative team of staff-owners

The available position requires documenting midsize and large projects (e.g. \$40M to \$100M+ construction value). Your role includes design collaboration, coordination and communication with and between the DPI team and the interdisciplinary design and engineering consultants. Tasks include overseeing the transition between conceptual design and later design phases and include leading the creation of permittable / biddable / constructable packages of graphic and narrative exhibits supporting the bid, award, construction and post-construction phases of projects. Construction phase tasks may include shop drawing review, RFI responses, creation and oversight of post award modifications, and construction closeout work

Experience in commercial, DoD, educational and / or multifamily projects is desired. Experience with projects in Hawaii is a plus

Qualifications

- Professionally licensed architect, preferably licensed in Hawaii
- Minimum Bachelor of Architecture degree or equivalent combination of education and relevant experience
- Minimum 6 years, 10+ years preferable of relevant professional experience
- Well-rounded experience in independently leading the construction of design and construction documents from Pre-Design through Construction Documents, including regulatory approval, bid, award, construction and post construction phases.
- Excellent and current experience with relevant codes and regulations including discretionary permits unique to Hawaii
- You should be able to multi-task, have excellent organizational, writing and verbal communication skills, and work well both leading and managing the production team and completing tasks independently with minimum supervision
- Have a strong work ethic, be organized, a team player, demonstrate initiative, demonstrate critical thinking, able to gain new skills and knowledge

- Revit Architecture, Bluebeam Revu, MS Office suite including cloud collaboration tools proficiency required. AutoCAD and Google Workspace / Google productivity suite skills is a plus

Compensation

Salary commensurate with experience. Competitive benefit package. ESOP (Employee Stock Ownership Plan) available.
